# Challenging Times?

## Come See What Western Washington University Has to Offer!

With downsizing and layoffs more prevalent these days, the students in Western Washington University's Plastics Engineering Technology program may be able to help fill in some gaps at your company and work on special projects. For years, WWU has been providing highly trained and talented students to the regional plastics industry for internships or permanent positions. **Come and see what WWU students might be able to do for your company!** This event is also being supported by SPE's Pacific Northwest Section.

If you are interested in recruiting, contact Nicole Hoekstra of WWU at Nicole.Hoekstra@cc.wwu.edu with a job description & she will coordinate with you directly.

## Friday, April 24, 2009

Engineering Technology Building
516 High Street
Bellingham, WA 98225

| | |
|---|---|
